Trigger

THE GATEKEEPER

Theft, vandalism, and unwatched sites.

The Gatekeeper is self-contained remote video surveillance for construction and remote job sites — including sites with no power. Watched 24/7 from our central station.

DIESEL OR SHORE-POWER UNIT

Four fixed cameras and one PTZ

Each unit has four fixed cameras and one PTZ camera.

Events to our station, or to you

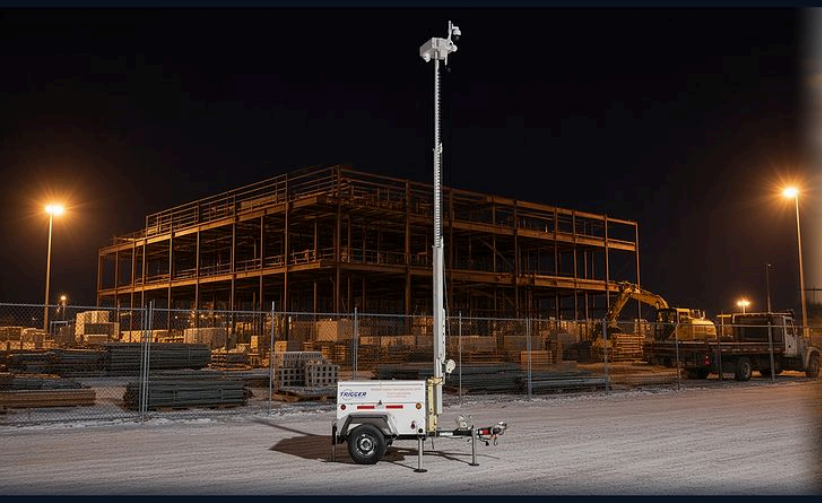

The unit can send events to our monitoring station or directly to you.

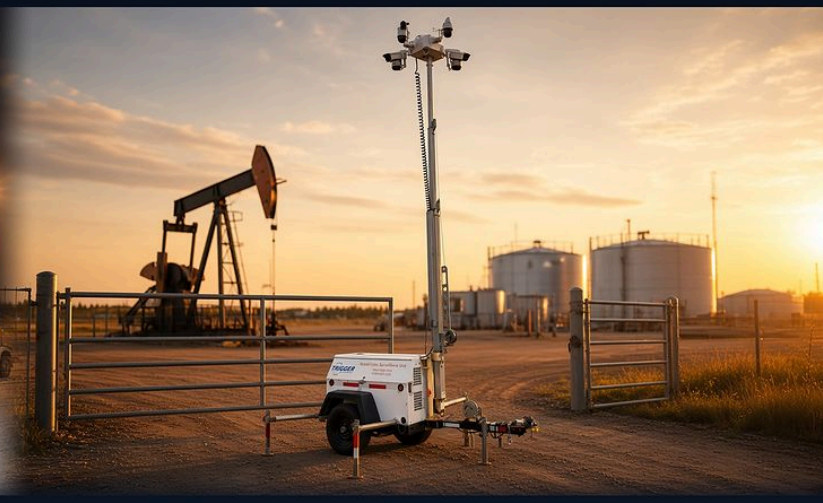

Solar, or diesel and shore power

Solar units work where there's no power. Towable tower units run on either diesel or shore power.

CONSTRUCTION SITE SECURITY

Why guards and cameras alone fall short

Stockpiles of construction supplies, remote and changing sites, and frequent contractor access make it hard to fully protect a job site with security guards alone. Cameras on the perimeter are not enough: criminals who aren't caught in the act tend to come back, adding to your security costs every time.

UNIT OPTIONS

Solar, or diesel and shore power

Solar units

Powered by the sun with no external requirements, so they work on remote and changing sites.

Diesel or shore power

Towable tower units that run on either diesel or shore power.

4 + 1

Four fixed cameras and one PTZ

Each unit has four fixed cameras and one PTZ camera.

Events to our station, or straight to you

The unit can send events to our monitoring station or directly to you. Our central station watches your location 24/7.

Protect your next job site

Tell us about your site and we'll recommend the right Gatekeeper setup.
